All GM data controlled vehicles. Control of Passlock and PK3. Interface module self-adjusts to various vehicle platforms.

Note: Connector 2 is to be wired only for and Cadillac or if the SECURITY light turned on after start, (see diagrams below).

PROGRAMMING SEQUENCE:

- | Locate and press the programming switch while inserting the wire harness into connector 1 of the GMDAPK3 module. The LED status indicator will illuminate to indicate you are in programming mode. Keep the programming button pressed while turning the ignition to the "ON" position. Release the programming switch once the LED status indicator flashes rapidly.
- Start the engine (utiling the vehicle key). The LED status indicator will turn off to indicate the module has been programmed for either PK3 or Passlock (and control of additional features where applicable). Turn the key to the "OFF" position. The module is now ready for use.

Note: The manufacturer/distributor is not responsible for any damages which may directly or indirectly result from the installation of this module. The manufacturer/distributor is limited to the repair or replacement of this module in the case of manufacturing defects.
